This Declaration of Conformity represents that based on all available information known to Fastenal up to this date, all duties under the European Union regulation no. 1907/2006 on the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) regarding the disclosure of Substances of Very High Concern (SVHC) according to Article 33 of the regulation with respect to the below identified products have been fulfilled. This includes products sold under the Holo-Krome name brand. In addition, REACH compliant products are not required to be registered with the Waste Framework Directive 2008/98/EC, (S.C.I.P.)

This REACH Declaration of Conformity applies to specific products and coatings or platings listed below and is not intended to represent all Fastenal products.

REACH OBLIGATIONS FOR SUPPLIERS OF ARTICLES

Please find below for your convenience some of the important obligations for suppliers of articles according to REACH. Please note that the below information is not legally binding and is only provided for informational purposes.

What is an article?

The meaning of an “article” is defined in Article 3 (3):

***Article:** means an object which during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition;*

The function of an article is determined by the intended use and purpose of the article as this is identified by the supplier of the article. The function is also determined according to the expectations determined by the buyer of the article.

The function of an article is therefore often identified by the documentation accompanying the product such as Instruction Manuals, Safety Instructions or any instructions supplied for installation or maintenance of the article.

Main Obligations for article suppliers under REACH:

Information to the European Chemicals Agency (ECHA)

The duty to communicate information about the chemicals in the products to the ECHA applies according to **Article 7** of REACH.

- Article 7(1) requires Producers and Importers of products to register with the ECHA chemical substances that are intentionally released from the products during use.
- Article 7(2) requires Producers and Importers of products to notify the ECHA of the content of Substances of Very High Concern (SVHCs) if the concentration of SVHC is above 0.1% weight by weight (w/w) and the total amount put on the EU market by the subject company is more than 1 ton a year.

The duty to register and notify according to Article 7 can be fulfilled by using the REACH IT tool that can be accessed free of charge at the ECHA website.

Only manufacturers and importers established in the EU can submit registrations and notifications according to Article 7.

Non-EU manufacturers of products containing substances that require registration or notification can appoint an Only Representative according to Article 8 in REACH and fulfill these requirements through the only representative. Non-EU manufacturers that use an Only Representative will remain anonymous during the process of registration or notification.

Substances subject to authorization

Manufacturers of articles in the EU may use a substance for an authorized use provided they obtain the substance from a company that has received an authorization for this use and they use it within the conditions laid out in that authorization. The information on the uses covered by the authorization and any

applicable conditions must be provided by the supplier of the substance. Alternatively, the manufacturer can apply for an authorization for their own use or their customers' uses.
